PROFILE

Software Engineer specializing in front-end development with a focus on utilizing TypeScript, React, and Next.js, integrated with API and database functionalities. I am deeply passionate about writing clean and efficient code, consistently prioritizing the creation of solutions that can be readily understood and integrated by team members. This approach not only fosters collaborative synergy but also drives project success and enhances overall productivity.

SKILLS

<u>Languages</u>: **JavaScript** | **TypeScript** | HTML | CSS
<u>Frameworks & Libraries</u>: **ReactJS** | **NextJS** | Redux | NodeJS | Express | Prisma | TailwindCSS | Sass
<u>Databases & Others:</u> MongoDB | PostgreSQL | MySQL | Supabase | Docker | Git | GitHub | Figma

PROJECTS

Cafe Hopping ↗ (Next.js, TypeScript, next-auth, Prisma, PostgreSQL, Google Maps API)

Full-stack application designed to help cafe enthusiasts discover and engage with cafes either nearby or in specified areas.

- Integrated Google Maps API to fetch and display detailed information about various cafes.
- Implemented user authentication through next-auth, allowing users to have personalized experiences. Authenticated users can save their favorite cafes, explore popular choices through a 'like' feature, and read reviews to make informed choices.

Money Note ↗ (React, RTK, MongoDB, Express, JWT, Tailwind)

Full-stack financial management application that empowers individuals to track and manage their financial transactions.

- Store data in MongoDB and fetched/updated/deleted the data on the front end.
- Implemented JWT for secure and reliable user authentication, safeguarding users' sensitive financial data.
- Added a personal touch to the app by allowing users to customize their profiles, fostering a personalized and engaging user experience.

Teddies vs Monsters ↗ (Next.js, strapi, stripe, PostgreSQL, Cloudinary, docker, TypeScript, Storybook)

Comprehensive gaming website designed for a real client.

- Developed a fully functional shopping cart allowing visitors to add and remove products, with a clear display of selected items and the total payable amount.
- Integrated Stripe for secure and reliable payment processing, enabling authenticated users to smoothly proceed to checkout.
- Leveraged Storybook to create a component library, promoting consistency and reusability across the application.

WORK EXPERIENCE

Salesperson | Yashima & Co., Ltd   Apr 2020 - Jun 2022

- managing contracts for the supply of transformer equipment to substations owned by JR East.
- working closely with factories to prepare persuasive proposals based on detailed research into the equipment's service history and lifespan.
- successfully steering clients to favorable decisions and maintaining strong relationships.

EDUCATION

Web and Mobile Application Development Diploma Aug 2022 - Present
Cornerstone International Community College of Canada, Vancouver, BC

Bachelor of Sociology Apr 2015 - Mar 2020
Kyoto Women's University, Kyoto, Japan

Exchange student (Focused on Sociology & Anthropology) Apr 2018 - Apr 2019
University of Alberta, Edmonton, AB, Canada
